

Health IT Quick-Stat # 10

Percent of Participating Eligible Hospitals Selecting at Least One Public Health Measure

November 2013

Summary:

Overall, in 87 percent of eligible hospital attestations, the hospital selected without exclusion, at least one public health measure. This has risen from 84 percent in 2011. All participating eligible hospitals in Alaska, Delaware and Utah are selecting at least one public health measure without an exclusion. 90 percent of eligible hospitals returning for their 3rd year of Meaningful Use attestation are selecting at least one public health measure without exclusion.

Source:

Office of the National Coordinator for Health IT analysis of CMS EHR Incentive Program data, as of November 30, 2013.

Notes:

Eligible Hospitals and Critical Access Hospitals are participating in a voluntary incentive program whereby they demonstrate meaningful use of certified electronic health record technology. One of the requirements of the Meaningful Use program is that hospitals must electronically report data to a local jurisdiction public health agency in at least one of three categories: immunizations, laboratory results or syndromic

surveillance. Hospitals may select a measure and claim an exclusion if the local public health agency does not have the capacity to accept these data electronically.
